New trends in marine Biotechnology at CIIMAR

Vitor Vasconcelos and Susana Moreira
vmvascon@fc.up.pt and smmoreira@ciimar.up.pt

Areas of interest

Marine Natural Substances

Pharmaceutical and Biomedical applications

Environmental and industrial applications

Bioremediation

Aquaculture

Opportunities

Actual and proposed extension of the Portuguese continental platform

Access to samples of continental Portugal, Azores and Madeira Islands

Culture collection of cyanobacteria with more than 350 strains

Culture facilities for cyanobacteria, algae and invertebrates

This research was partially supported by the European Regional Development Fund through the COMPETE - Operational Competitiveness and Training Programme and national funds through FCT, under the project "PTDC-CIM/MAR/098123/2008".
